BUREAU OF STATISTICS AND ECONOMIC ANALYSIS

Brennick Valley, the Capital and Pellmarsh Hills designated for the first quarter of 2027

To: Joel Ferguson, Minister of Labour and Economic Development
From: Heidi Bond, Chief Statistician
Date: 13 May 2027
Re: Certification under section 3 of the Regional Rapid Response Program Regulation, first quarter of 2027

I certify that Brennick Valley, the Capital and Pellmarsh Hills are designated for the first quarter of 2027 under section 2 of the Regulation. Each one's seasonally adjusted payroll jobs for January to March 2027 are more than 1.0 per cent below its payroll jobs for 2026; no other region's are. The figures below are those section 3(3) requires.

Economic region	Seasonally adjusted payroll jobs, Q1 2027	Payroll jobs, 2026	Per cent
Capital	82,020	83,320	−1.6
Brennick Valley	24,770	25,250	−1.9
Pellmarsh Hills	21,930	22,390	−2.1

Jobs rounded to the nearest 10; the test compares unrounded figures (section 2(2)).

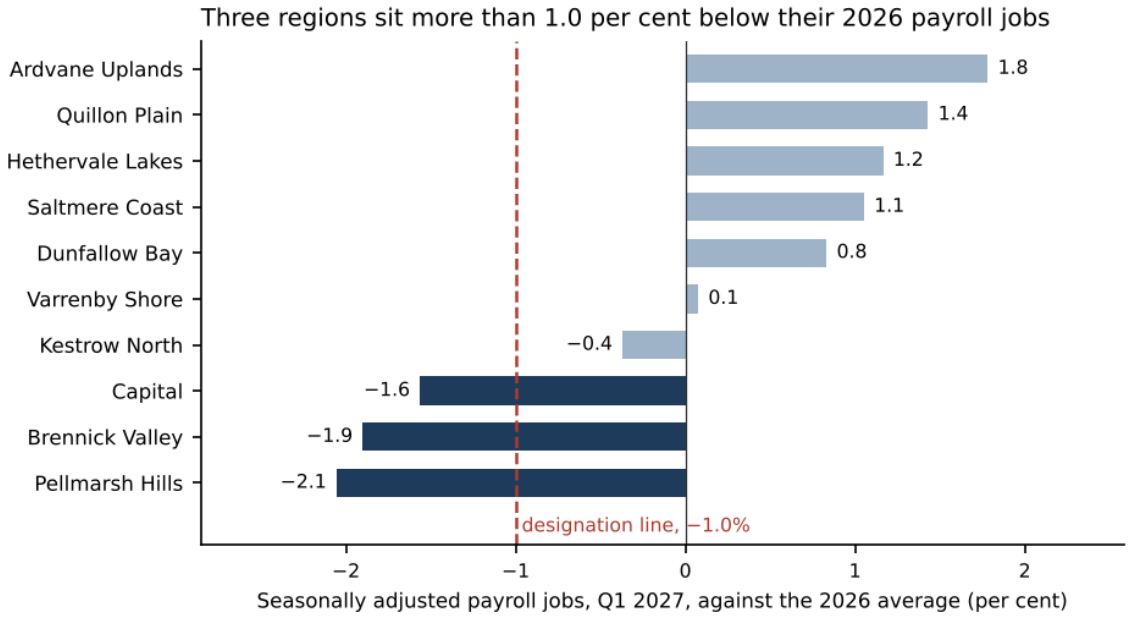

Figure 1. Every region's seasonally adjusted payroll jobs for the first quarter of 2027 against its 2026 average; designated regions dark.

How the series were built

Payroll jobs are the jobs on employers' monthly returns to the Provincial Revenue Agency: its yearly tables for 2021 to 2023 and its monthly statistics from January 2024, with January to March 2027 as revised on 7 May 2027, placed in the economic regions through the bureau's municipal concordance (Wexleigh and Dorran, amalgamated as Wexleigh-Dorran in 2025, are in Quillon Plain under both codes).

From the January 2026 reference month the Agency places jobs at the workplace; before, every job of an employer sat at the municipality of its account address, and the earlier months were not revised. The change moved jobs out of the Capital (−16.3 per cent at January 2026) and Saltmere Coast and into the regions where employers based there have mines, mills, plants, hospitals and stores, most of all Kestrow North (+27.6 per

cent) and Varrenby Shore (+23.2 per cent). The quarter and 2026 are both on the new placement, but the seasonal pattern comes from the whole history, so each region's pattern was estimated with the change removed as a level shift: a regression of the logarithm of its monthly payroll jobs on month effects, a trend whose slope changes each January, and a level shift from January 2026. The seasonally adjusted figures remove the month effects. Estimated across the change instead, the pattern takes up part of it, and the first quarter's factors carry the January 2026 step into 2027.

Every region's result

Economic region	SA payroll jobs, Q1 2027	Payroll jobs, 2026	Per cent	Designated
Capital	82,020	83,320	−1.6	Yes
Saltmere Coast	51,130	50,590	1.1	No
Brennick Valley	24,770	25,250	−1.9	Yes
Dunfallow Bay	20,330	20,160	0.8	No
Quillon Plain	30,800	30,360	1.4	No
Hethervale Lakes	17,490	17,290	1.2	No
Ardvane Uplands	15,680	15,400	1.8	No
Kestrow North	18,830	18,900	−0.4	No
Pellmarsh Hills	21,930	22,390	−2.1	Yes
Varrenby Shore	15,070	15,060	0.1	No
