The 2027 Harbourgate patrol slate moves into the small hours

Bethan Murray, Community Safety Manager. For the council's community safety committee at the annual review, 29 January 2027.

Recommendation

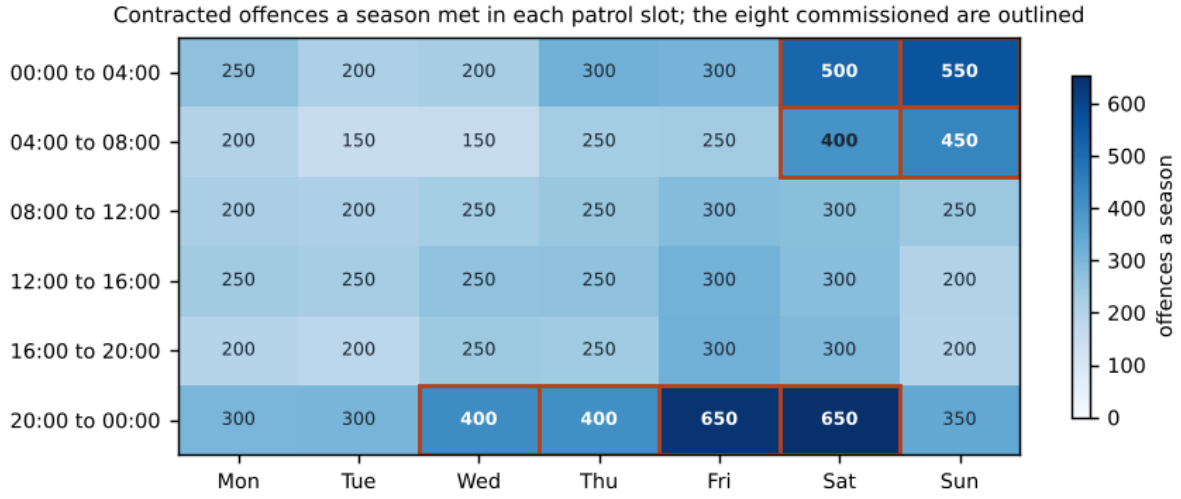

Commission the eight slots in the table below: Saturday, Sunday and Friday through the late evening and the small hours, the two early-morning slots as the market opens, and the Wednesday and Thursday evenings. The agreement covers 12,510 recorded offences a season in the quarter, and over a season those eight slots would have a patrol on the ground for 4,050 of them, against 2,800 for the eight slots the windows' midpoints put first. The ninth slot by weight is Sunday 20:00 to 00:00, at 350 against the 400 of the weakest of the eight, so the eight are not finely balanced and the slate should hold for the whole season, as clause 6.1 requires.

The eight slots

Slot	Offences a season met in it
Saturday 20:00 to 00:00	650
Friday 20:00 to 00:00	650
Sunday 00:00 to 04:00	550
Saturday 00:00 to 04:00	500
Sunday 04:00 to 08:00	450
Wednesday 20:00 to 00:00	400
Thursday 20:00 to 00:00	400
Saturday 04:00 to 08:00	400
The eight together	4,050

Source: the records management extract of 22 January 2027, offences of the classes at Annex B recorded at the five locations in the quarter's location register, 1 April to 30 September 2025 and 2026. Figures are one season, the mean of the two on record, to the nearest fifty offences.

The week

How the figures are built

Almost none of these offences was seen happening. A business is shut at ten and open at seven and the shutter has been forced; a car is left at the Quayside at half past eight and the window is out by one. The record holds the two times the victim can vouch for and nothing between them, and for nine in ten of the covered offences they are more than four hours apart, so a single offence belongs to more than one patrol slot. Each offence is therefore counted into every slot its occurrence window touches, in proportion to the share of the window that falls in that slot, and a slot's figure is the sum of those shares over the two seasons

on record, divided by two. The workbook harbourgate_slot_weights.xlsx carries the figure for every slot in the week, and the volume, location and footfall tables behind this paper.

Taking the earliest time each offence can have happened as the time it happened would put the whole slate on the seven evening slots and Friday morning, and would credit it with 6,200 offences a season. Those eight slots would in fact have a patrol present for 3,300, a fifth less than the slate above.
