Keep Delvenne lit, Ardenwick mid, Thursgate mid and Quintrell SI off the platform's venue list

From Owen Porter, Head of Dealing, Fenmarsh Investment Management. 20 November 2026. For decision.

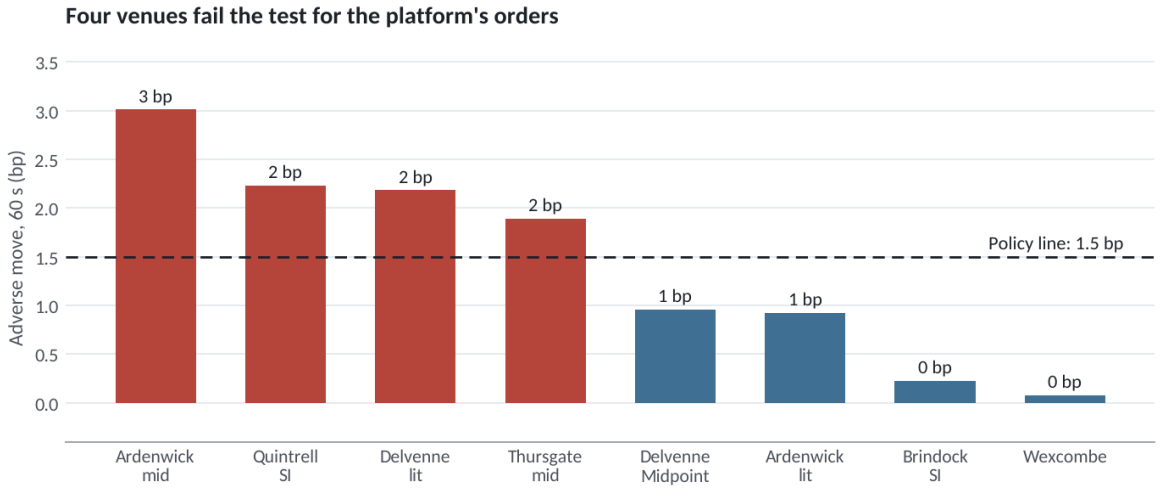

When the central desk starts dealing for the platform on 4 January 2027, the platform's market orders should go only to Wexcombe, Ardenwick lit, Delvenne Midpoint and Brindock SI. Delvenne lit, Ardenwick mid, Thursgate mid and Quintrell SI fail the order execution policy's adverse-move test for the platform's orders: the mid moves against an order filled there by 2 (Delvenne lit), 3 (Ardenwick mid), 2 (Thursgate mid), 2 (Quintrell SI) basis points on average in the minute after the fill, against the policy's line of 1.5.

The evidence

The platform's market orders are small and each goes whole to one venue in one execution, so nothing of the desk's follows them into the next minute. Most of the desk's 2026 fills were not like that: they were child orders of the algorithms' parent orders, and the same order's next fills, often within seconds, kept moving the mid the desk's way inside the earlier fills' minute. That flatters the venues the algorithms use at the start of an order, the midpoint books above all, whose averages over every 2026 fill sit under the line. Read on the 69,118 fills with no desk trade in the same share in the following minute, the venues' moves are those in the table.

Venue	Type	Fills read	Adverse move (bp)	Platform list
Wexcombe Stock Exchange	lit order book	13,861	0	On the list
Ardenwick MTF lit book	lit order book	10,524	1	On the list
Delvenne MTF lit book	lit order book	9,704	2	Kept off
Ardenwick MTF midpoint book	midpoint book	4,877	3	Kept off
Delvenne Midpoint	midpoint book	5,365	1	On the list
Thursgate MTF midpoint book (THGD, THGM)	midpoint book	4,903	2	Kept off
Brindock Securities SI	systematic internaliser	9,098	0	On the list
Quintrell Markets SI	systematic internaliser	10,786	2	Kept off

Busted executions out; Thursgate's two segment codes are one venue; closing auction fills and fills in the last minute before the close have no 60-second mid. Source: Hessenby Analytics' execution export, 2 January to 30 October 2026.

Red: kept off the list. Each bar is the average adverse move over the desk's 2026 fills with no desk trade in the same share in the following minute.

The platform's market orders

Under the 2027 dealing plan the client orders Gresmere dealt in 2026 come to market orders that are small against each share's average daily volume, largest at the 09:30 point, which carries the evening's and the early morning's orders.

Dealing point	Mean size, % of ADV
09:30	0.169
12:00	0.119
14:30	0.112

The platform's dealing through Gresmere in 2026

Month	Bought less sold (£m)
January 2026	4.72
February 2026	4.40
March 2026	5.05
April 2026	3.71
May 2026	4.31
June 2026	3.13
July 2026	4.65
August 2026	4.23
September 2026	3.18
October 2026	3.87

Value of the shares at the dealing price, before commission, PTM levy and stamp duty, by trade date; Gresmere's notes settling 2 January to 3 November 2026.
