Governor's Highway Safety Office

Re: Four counties certified high-range for the FY2028 County Impaired Driving Task Force grants

Dear Janet Brooks,

Under section 2.1 of the FY2028 program guidelines, the Center certifies Corwin (0.71 alcohol-impaired-driving fatalities per 100 million vehicle miles, 2023 to 2025), Hatchell (0.68), Ossian (0.68) and Tanager (0.66) as high-range for FY2028. The other ten counties are below 0.60; the nearest is Kittredge, at 0.57.

Tanager is on the list because most of its surviving drivers were never tested. The State Patrol and the Corwin and Ossian sheriffs draw blood from every surviving driver; the county and city agencies draw it only after an arrest at the scene. Where every driver is tested, officers arrested 28.6 per cent of the drivers between .08 and .149 and 88.9 per cent of those at .15 or more, so each arrested driver found at .08 or more elsewhere stands for 3.5 drivers in the lower band and 1.125 in the higher. Tanager's county and city agencies arrested 8 such drivers in the lower band and 8 in the higher, which puts 21.0 impaired surviving drivers there untested.

Four counties at or above 0.60 alcohol-impaired-driving deaths per 100 million vehicle miles, 2023 to 2025

Deaths per 100 million vehicle miles; labels on the high-range counties and the nearest below the line

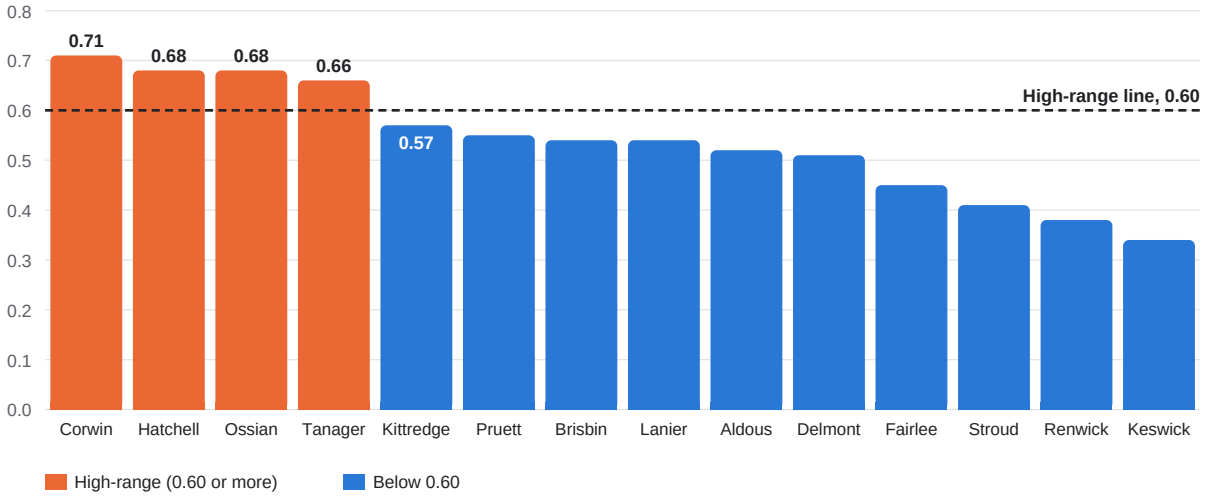

Figure 1. Each county's 2023 to 2025 rate against the 0.60 line (guidelines 2.4); Table 1 gives every county's figures.

Table 1. Rates and 2025 baselines by county

County	Deaths, 2023 to 2025	Vehicle miles (100 million)	Rate	High-range	Impaired-driving offenses of 2025 prosecuted	Convicted of impaired driving by 28 Feb 2027
Aldous	32	61.57	0.52	No	160	57.5%
Brisbin	59	109.27	0.54	No	335	63.3%
Corwin	60	84.55	0.71	Yes	225	62.7%
Delmont	79	154.94	0.51	No	354	62.4%
Fairlee	90	200.37	0.45	No	400	62.5%
Hatchell	85	124.82	0.68	Yes	340	60.0%
Keswick	78	229.80	0.34	No	523	64.6%
Kittredge	43	75.69	0.57	No	192	58.3%
Lanier	51	94.92	0.54	No	250	56.8%
Ossian	54	79.63	0.68	Yes	211	60.2%
Pruett	102	185.31	0.55	No	379	54.9%
Renwick	67	175.73	0.38	No	370	62.4%
Stroud	57	139.69	0.41	No	314	60.8%
Tanager	66	99.91	0.66	Yes	415	62.2%

Sources: Fatal Crash Census, 2023, 2024 and 2025 files; DOT county daily vehicle miles 2023 to 2025; Administrative Office of the Courts criminal traffic case extract of 2 March 2027.

Deaths are the number expected from the census records under guidelines 2.2, rounded to whole deaths; each rate is computed from the unrounded count and compared with 0.60 before rounding. Vehicle miles are the DOT's daily miles times 365 days, 366 in 2024.

The baselines in Table 1 are the section 3.1 figures each task force application states: the impaired-driving offenses committed in the county in 2025 that its county court had prosecuted by 28 February 2027, one for each person charged and offense, and the per cent of them that had ended in a conviction for impaired driving by that date.

Sincerely,

Mary Mitchell
Impaired Driving Program Coordinator, Center for Transportation Safety
