# Refunds made late, January to June 2026: £127,785 to the goodwill fund

To Neil Fisher, Senior Trading Standards Officer, Trading Standards Service, Calvermoor County Council. From Howard Jones, Head of Regulatory Compliance, Wrenfield & Holt Ltd. 12 November 2026. Ref TS/CON/26/0417. Sent with the return under paragraph 2 of the written assurance of 9 October 2026.

## Payment and commitment

We made 87,641 refunds in January to June 2026 for goods returned to our Cotterby returns centre. Of those, 8,519 were made on day 15 or later, counting calendar days from the day the goods-in scan recorded the parcel at the centre. Under paragraph 5 we will pay £127,785 into the customer goodwill fund held by the Meridale Consumer Trust (8,519 refunds at £15) within 28 days of this return. The 95 per cent commitment in paragraph 4 was not met in February, March and April; it was met in the other months. Most of the late refunds follow the January backlog at the centre: parcels delivered in January that waited at the back of the hall were opened as it cleared and refunded from February to April. The late refunds made in May and June are for parcels delivered in May.

Refunds made late as a share of each month's refunds. Source: Cotterby goods-in and returns processing records and the refund ledger, extracts of 30 October 2026.

## How each refund was dated

Apart from 2,503 parcels still on prepaid labels in early January, the parcels the centre received in 2026 carry no reference that the goods-in scans and the processing records share, so each refund's delivery day is the goods-in scan of the parcel the centre opened for it. We matched the two records in the order the centre works its returns hall: the parcel opened is always the newest one waiting, rejected parcels included. That order holds on all 181,318 openings where both records carry the parcel's prepaid label, from December 2024 until the last labelled parcels were opened in April 2026, and it reproduces the late refunds the labels show for February and December 2025.

## Goodwill vouchers for refund delays

Every voucher our customer services team gave for a refund delay in January to June 2026, by the main category of the order the refund was on, which is the order named in the customer's case (the voucher record's own order field names, for some vouchers, a later order of the customer's that was never returned or refunded). Irish site vouchers are in euros and are converted at our 2026 reporting rate of £0.86 a euro.

| Category of the order | Vouchers issued for a refund delay | Value (GBP) |
|---|---|---|
| Womenswear | 1,523 | 11,117 |
| Menswear | 648 | 4,693 |
| Footwear | 621 | 4,537 |

| Category of the order | Vouchers issued for a refund delay | Value (GBP) |
|---|---|---|
| Home | 402 | 2,840 |
| Kids | 356 | 2,608 |
| Accessories | 275 | 1,922 |
| All categories | 3,825 | 27,717 |

Shares are of each month's refunds made, to one decimal. A refund made on day 14 meets the commitment. Refunds for parcels delivered in 2025 count in the month they were made, from their own delivery day. Vouchers count in the UK calendar month they were issued.
