Lucia Morrison
Contract Manager, Tallis Field Research Ltd

Price collection assessment, July to September 2026

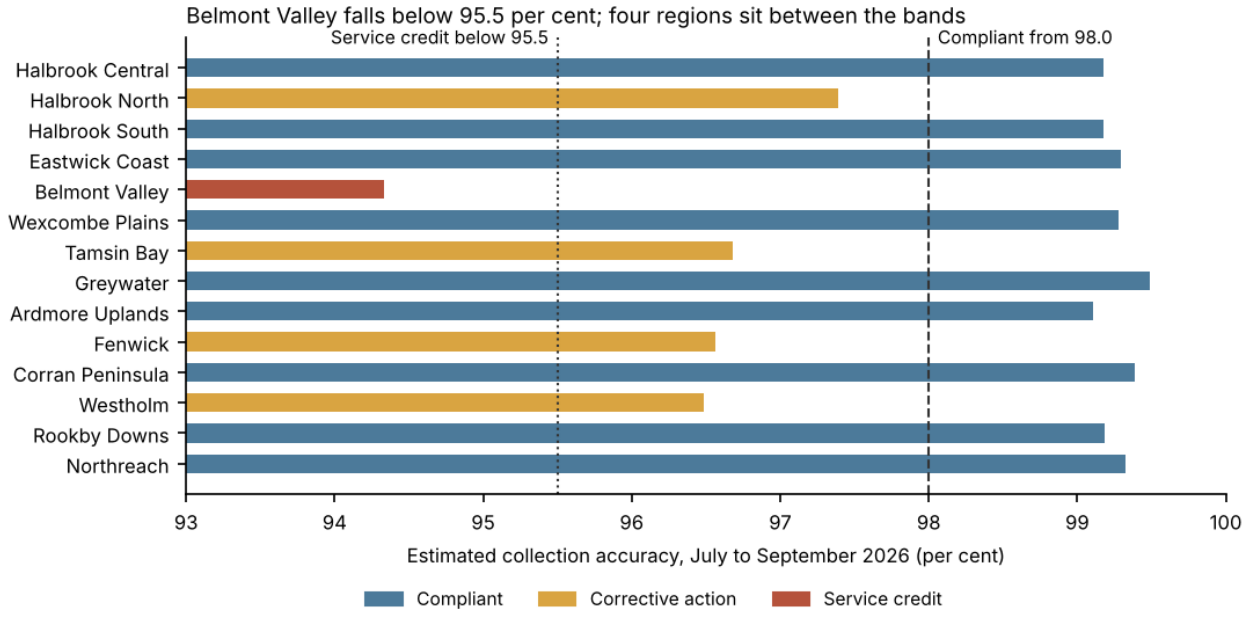

Dear Lucia,

This is the quarterly assessment under the Price Collection Quality Standard (version 3.0) for the collection your teams carried out from July to September 2026.

Outcomes. Halbrook North, Tamsin Bay, Fenwick and Westholm are placed under corrective action, with accompanied collection in every month of the October to December quarter. Belmont Valley falls below 95.5 per cent and so carries a service credit as well as accompanied collection. The other nine regions are compliant: Halbrook Central, Halbrook South, Eastwick Coast, Wexcombe Plains, Greywater, Ardmore Uplands, Corran Peninsula, Rookby Downs and Northreach.

Service credit. The credit for the quarter is $1,775, 4 per cent of the quarterly collection fee in Schedule 4 for Belmont Valley ($44,380). It will be deducted from the invoice for the October to December quarter.

How accuracy was estimated. The Field Quality Team's officers re-collected prices from the same day to a week after your collectors' visits, so a re-collected price can differ because the outlet changed the price in between. Each re-collection was allowed the chance that its item's price had moved since the visit, from the item's monthly frequency of price change in the price database and the days between the visit and the re-collection, before the share of correctly recorded prices was set against the bands.

Timeliness, missed visits and replacement acceptance for each region are in the attached workbook, pcqs_2026q3_assessment.xlsx. Please confirm the accompanied collection arrangements for the five regions by 30 October.

Yours sincerely,

Joanne MacDonald
Head of Prices, National Statistics Office
