Ten officers come off X-ray duty at the January 2027 recertification

To Teresa Malone, Head of Security Screening
From Training and standards lead
Date 3 December 2026
Subject Screening year 2025-26: annual assessment, currency and lane throughput under SCS-04 revision 6

1. Annual assessment

Ten officers come off X-ray duty from 1 January 2027 until they have completed remedial training and passed the image interpretation assessment (SCS-04 section 4). Every other officer holding an X-ray endorsement on 30 November 2026, 81 in all, is recertified for 2027.

Officer	Staff no.	Employment	Checkpoint	New objects shown	Detected	Detection (%)
Kathy Waters	SC19116	Full-time	Domestic	127	71	55.9
Connie Hutchinson	SC46133	Casual	Domestic	185	106	57.3
Lauren Vincent	SC42948	Casual	Domestic	197	117	59.4
Carrie Le	SC17045	Casual	Domestic	205	124	60.5
Kenneth Ferguson	SC29369	Full-time	Domestic	107	68	63.6
Becky Zavala	SC46312	Full-time	Domestic	119	77	64.7
Eric Meyer	SC16884	Casual	Domestic	183	120	65.6
Barbara Austin	SC19645	Full-time	Domestic	125	87	69.6
Jared Juarez	SC43647	Full-time	Domestic	148	109	73.6
Richard Lucas	SC46282	Full-time	Domestic	128	95	74.2

Projections from 1 July 2025 to 30 November 2025 count only to decide whether an object had already been shown to the officer.

SCS-04 reads detection performance on prohibited items the officer has not been shown before. Here an item is a threat object in the TIP library, whichever of its orientations was projected, and before runs back through the CT record to 1 July 2025: in the screening year first showings of an object were detected 88.5 per cent of the time against 99.5 per cent for repeat showings, an orientation new to the officer whose object had already been shown 99.3 per cent, and an object first shown before December over 99 per cent when shown again. Keyed on the image, or counted from 1 December, first showings would take off only four casual officers. Seven of the officers coming off clear 80 per cent on the raw hit rate, six of them full-time.

Source: threat image projection records, 1 July 2025 to 30 November 2026, joined to TIP library release 1.0 and the CT operator logins; officers from the officer register at 30 November 2026.

2. Currency

Officers endorsed for the whole of each month, by the officer register's endorsement and lapse dates, who fell short of the 20 hours of X-ray time a month that SCS-04 section 5 requires.

Month	Endorsed all month	Short of 20 hours
December 2025	93	19
January 2026	93	17
February 2026	93	20
March 2026	93	14
April 2026	92	17
May 2026	92	18
June 2026	92	17
July 2026	92	17
August 2026	91	15
September 2026	91	15
October 2026	91	12
November 2026	91	16

Source: lane roster and payroll leave records. An officer's X-ray time on a lane is the time worked there divided by the officers working the lane at each moment (SCS-04 section 3); an officer on personal leave on a rostered day records no projection that day and did not work.

3. Throughput

Passenger bags each CT lane screened in each quarter of the screening year, to the nearest thousand, for the year-end return to the security committee (SCS-04 section 6).

Lane	Dec-Feb	Mar-May	Jun-Aug	Sep-Nov
D1	219,000	209,000	209,000	213,000
D2	212,000	199,000	204,000	204,000
D3	174,000	168,000	167,000	167,000
D4	137,000	132,000	131,000	133,000
D5	74,000	71,000	71,000	71,000
I1	144,000	136,000	135,000	140,000
I2	120,000	113,000	114,000	117,000

Source: CT units' hourly image counts, each unit placed on the lane it stood on that day (D2's unit replaced in March 2026, and the spare unit's days on a lane whose own unit was away, included). Images counted before a lane's first rostered start are start-up test images (SCS-04 section 3), and no projection is recorded on the lane then; they are left out. Quarters in Sydney time.
