Six general practices join the statin follow-up programme in 2027

To: the practice planning committee. From: Hanne Overgaard, medicines unit. 12 February 2027. Subject: practices joining the 2027 programme (programme description 2.1).

Recommendation

Yes. Six practices join the programme in 2027: Lægehuset Østergade (041219, 48%); Klinikken Bredgade (041236, 53%); Lægerne Skovvej (041248, 48%); Lægeklinikken Kirkebakken (041275, 48%); Lægerne Møllevej (041307, 54%); Lægerne Stationsvej (041322, 53%). Each kept fewer than 60 per cent of its new statin users of the second half of 2025 on treatment for twelve months; the other ten practices are at 65 per cent or more.

Source: statin dispensings 2024 to 2026 (register extract), statin products, practice register 2026; new statin users of 1 July to 31 December 2025 by the practice of their first prescription.

Persistence is counted as the programme description sets it out (3.1 and 3.2): the 1,485 patients who started a statin between 1 July and 31 December 2025, each followed for 365 days, persistent if never more than 30 days in a row without tablets. The register holds no dose, so each patient's tablets are timed at the daily dose shown by the patient's own refills. Timing them at the WHO defined daily dose instead would let Lægehuset Østergade, Lægerne Skovvej, Lægeklinikken Kirkebakken, Lægerne Møllevej and Lægerne Stationsvej off, where many patients take two defined doses in one tablet or two tablets a day, and take in Lægerne i Vejlby, where many take half of one.

Pilot settlement and 2026 baseline

The 2026 pilot pharmacies are entitled to DKK 313.629 for conversations held and never cancelled; the quarterly statements paid DKK 327.918, because conversations cancelled after a statement date stayed on it. The workbook gives the amount per pharmacy and quarter and each practice's continuing statin users of 2026, each person counted once.

Note: 287 of the new users had one dispensing in their first year; at any dose it runs out within the year, so they count as not persistent.
