Product end-of-life notice EOL-2026-07

August 20, 2026

To: customers operating VPR-340 feeder protection relays

Re: VPR340-PSU-02 power supply module, last-time buy and end of repair

The VPR-340 relay was withdrawn from sale in 2018. Its power supply module, part VPR340-PSU-02, depends on components that our suppliers have now discontinued, and we will build one final production run.

Last-time-buy orders for VPR340-PSU-02 must reach us by December 15, 2026. Modules are sold in lots of 25 at CAD 1,965.00 per module (CAD 49,125.00 per lot), delivery by March 31, 2027. No orders are accepted after the final run.

Repair service for VPR340-PSU-02 ends on December 15, 2026. Modules already at our repair centre under an open RMA, and modules received under an RMA by that date, will be repaired or replaced and returned. A repair replaces the module's electrolytic capacitors and fan and ends with a full-load test. Modules received after December 15, 2026 will be sent back unrepaired.

Key dates	
Notice issued	August 20, 2026
Last day for last-time-buy orders	December 15, 2026
Last day for RMA receipts at the repair centre	December 15, 2026
Final shipment of last-time-buy orders	By March 31, 2027

The processor, input/output and display cards of the VPR-340 remain available until further notice. Customers planning feeder protection replacement can migrate VPR-340 settings to the VPR-560 platform with our conversion tool; application notes are on the customer portal.

For quotations and order acknowledgements please contact your Veldtek account manager or open a Lifecycle case on the customer portal, quoting EOL-2026-07.
