Communicable diseases weekly report

Week 35: notifications received 24 to 30 August 2026. Issued Tuesday 1 September 2026. Prepared by Tiffany Peters, surveillance.

Summary

The unit received 12 pertussis notifications for residents this week and 25 in the four weeks to 30 August, against 17 in the four weeks before that. Wagga Wagga residents account for 16 of the four weeks' notifications. Influenza notifications have fallen from 139 in the week ending 9 August to 79 this week.

The vaccination reminder for pregnant women and for infants due their six-week, four-month and six-month doses goes to general practices this week.

Notifications by week received

Week ending	12 Jul	19 Jul	26 Jul	02 Aug	09 Aug	16 Aug	23 Aug	30 Aug
Pertussis	6	2	6	3	8	1	4	12
Influenza	87	132	124	131	139	136	102	79

Residents of the unit's ten local government areas; notifications counted in the week the unit received them.

Pertussis by local government area

Local government area	Last 4 weeks	Year to date	Year-to-date rate per 100,000
Wagga Wagga	16	73	106.0
Griffith	3	29	104.7
Leeton	0	11	95.6
Narrandera	0	6	103.6
Murrumbidgee	0	0	0.0
Hay	0	2	69.9
Edward River	3	12	141.8
Junee	0	3	44.8
Cootamundra-Gundagai	3	16	141.0
Snowy Valleys	0	10	69.0
Unit total	25	162	100.2

Rates use the estimated resident population at 30 June 2025. Year to date: 1 January to 30 August 2026; the same period of 2025 had 242 pertussis notifications for residents.

Influenza

79 influenza notifications this week and 1234 since 1 January. A(H3N2) is the most common subtype among subtyped specimens this year.

Southern Inland Public Health Unit, surveillance. For internal distribution to the unit, the district's emergency departments and general practice liaison.
