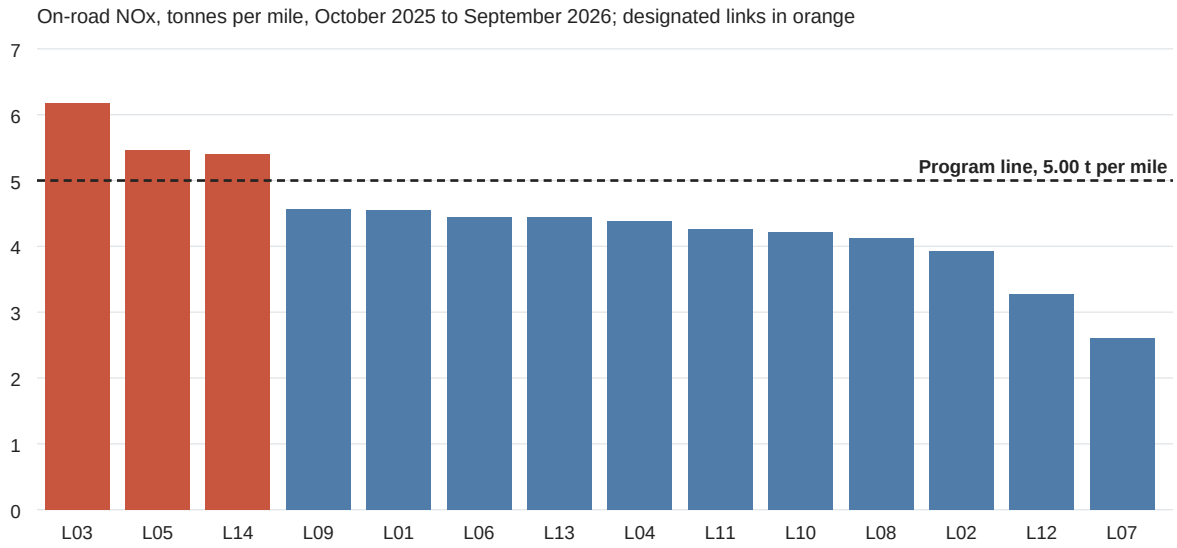
Air Corridor Program: 2027 link designations

To: Board of Commissioners From: Paige Hodges, Senior Environmental Planner Date: 4 November 2026

I recommend designating three of the fourteen port roadway links for the 2027 Air Corridor Program: L03, L05 and L14. Each carried 5.00 tonnes of NOx per mile or more from on-road vehicles between October 2025 and September 2026.

Each link was counted for two weekdays, and the year's traffic is built from those counts with the state's classifying count stations, class by class. That holds for the roads carrying general traffic. The trucks on the three terminal access roads are the terminals' own drays, and they come and go with the vessel calls: Terminal Way and Cargo Drive were counted in busy weeks at Berth 20 and Pacific Gateway, Pell Road in a quiet one at Berth 40. Their trucks are carried to the year by each terminal's own gate record, its average day over the year against its count days; expanded with the state stations' factors, Terminal Way and Cargo Drive cross the line and Pell Road misses it.



Link	Name	Designated
L01	Terminal Way, Gate 1 to SR-61	No
L02	Harbor Boulevard, 7th to 12th Street	No
L03	I-880 northbound ramps at Port Avenue	Yes
L04	Port Avenue, I-880 to Terminal Way	No
L05	SR-61, Mill Street to Harbor Boulevard	Yes
L06	Cargo Drive, Berths 30 to 34	No
L07	7th Street, Harbor Boulevard to Cole Creek	No
L08	I-880 southbound ramps at Port Avenue	No
L09	Delmar Road, I-580 to Cargo Drive	No
L10	Ridley Avenue, I-880 to rail yard	No
L11	Quarry Road truck route	No
L12	Harbor Boulevard, 12th to 20th Street	No
L13	Selby Street, rail yard to Terminal Way	No
L14	Pell Road, I-580 to Berth 40	Yes
