Rathbroe Pension Services
Work Measurement Standard, Member Operations

2022 study. Issued 3 October 2022. Owner: Resource Planning. Standard minutes are reviewed when a case type's process changes.

1 The study

1.1 Standard minutes were measured in the 2022 study by observation and by timed sampling across both operations centres, on 2,840 cases over eleven weeks.

1.2 A standard minute is a minute of handling time at standard performance, including contingency and personal allowances.

2 Standard minutes

Queue	Queue code	Standard minutes per case
Retirement quotations	MS-RQ	430
Retirement settlements	MS-RS	660
Transfers out	MS-TO	560
Transfers in	MS-TI	640
Death benefits	MS-DB	980
Leaver options	MS-LO	300
Member data corrections	MS-DC	360
Investment switches	MS-IS	240
Contribution queries	MS-CQ	215

3 Productive time

3.1 A rostered position is taken to give 420 productive minutes on a working day.

3.2 The net productive factor is 0.88. Productive minutes available to case work on a working day are therefore 420 multiplied by 0.88.

3.3 Offered load in positions-equivalents for a queue in a period is the cases received multiplied by the standard minutes for the queue, divided by the productive minutes available to one position across the working days of the period.

Naoise Daniels, Resource Planning, 3 October 2022.
